Vidget 3-in-1 Flexible Seating System™ Catalog

# Vidget Flexible Seating System™

## Fidget in your Vidget™

Did someone ever tell you to stop fidgeting in your chair and sit still? With the patented Vidget Flexible Seating System™, you don't have to! Plus, it's actually better for you. Vidget® inspires our bodies to move naturally and celebrates healthy learning!

Being able to fidget has proven to increase attention, focus and concentration. It creates a healthier environment by providing a safe and quiet way to release some of the endless energy kids, teens, and adults have.

# Modular & Versatile

## 3 - in - 1 Patented Design

The Vidget® can transform from an active seat into a supported stool or flat desk surface by simply turning it over. The modular & versatile design of the Vidget Flexible Seating System™ provides many opportunities for collaboration by allowing students & teachers to build their own environments based on individual and group needs.

CHAIR

STOOL

## Vidget 3-in-1 Flexible Seating System™

### Healthy Movement

Vidgets provide a safe and quiet movement that helps students to release energy while in control of their own physical movement resulting in greater self-regulation.

### Healthy / Blended Learning

Research proves that fidgeting while learning helps ALL students, but especially those with higher sensory needs. Vidgets are designed for the inclusive classroom environment.

### Healthy Spaces

Transform your space with the Vidget Flexible Seating System™. The flexibility of using the Vidget as a fidgeting chair, a stool, or a desk supports the need for adaptable spaces.

### Healthy Minds

Move your body, grow your mind. Studies have revealed that regular physical movement supports healthy minds by improving memory, focus and concentration.

# Early Childhood

## Safe: Student Can't Tip Backwards

Vidgets® meet the active needs of preschool, child care centers, schools and the home. Teachers love the versatility of the Vidget and especially appreciate the ease of cleaning, durability and stackable feature.

Allowing movement helps students to stay seated longer. Use during circle time, at the writing center or dramatic play area. Students stay on-task longer allowing for increased concentration and focus.

### “100 times better!”

*When Pearl is in a Vidget, her **behavior is 100 times better** than when she is in a normal chair. She still has difficulty sitting long, but it makes a **HUGE difference**. Without it, she's everywhere!*

**Lara, Pre-K Teacher**

# Elementary

## Promotes On-Task Behavior

Recent study of the Vidget® resulted in a **90% reduction in observable disruptive behaviors and 74% reduction in the number of times the teacher had to redirect students** in just 3 weeks of converting the entire class from traditional chairs to Vidgets!

### “So Grateful for Vidgets!

*One student was writing using 1-2 sentences and is now sitting down for extended periods of time to write 5-6 sentence paragraphs! I'm so grateful to have the Vidgets to give her the sensory input she needs so that the output matches her ability level. I think every Kindergarten class should have Vidgets!*

**Lora, Kindergarten Teacher**

**NO TIP DESIGN**  
students get the  
movement they  
need safely

**can't** tip  
backwards

# Middle & High School

## Ideal for Inclusive Classrooms

Vidgets® meet the changing needs of the 21st Century Inclusive Classroom where diverse students come together with the goal of universal learning. All students can benefit from the Vidget which helps to reduce stigmas associated with special education tools.

### “Great “tools” for my classroom

*After only having the Vidget chairs in my room for less than a week, I have observed a noticeable **increase in on-task behavior** from students who use them. Students who sit in the chairs **participate more and demonstrate greater self-management**. I am extremely excited and grateful to have these “tools” as part of my classroom.*  
**Dan, 6th Grade Integrated Teacher**

# Libraries & Resource Rooms

Activate Learning Environments

# Colleges & Universities

## Classrooms | Libraries | Flexible Public Spaces

College students are just big kids who also benefit from healthy movement! The 3-in-1 benefits of the patented Vidget Flexible Seating System™ inspires collaborative learning and flexible spaces.

Use in the classroom, libraries, study areas and public spaces. Vidgets transform space in step with the active lifestyle of college students. Vidgets help students to think creativity - a chair doesn't have to be just a chair.

# Perfect for Dorm Rooms

## Modular & Versatile

Vidgets naturally fit the needs of college students. The modular & versatile benefits work great in small spaces like dorm rooms and apartments. Place Vidgets in lounge areas to activate the space, provide healthy movement and inspire collaboration.

# Classroom Management

## Easy to Carry & Easy to Clean

- Top handle makes for easy carrying
- Lightweight & easy to clean
- Stackable for organized storage
- No assembly required
- Fits under or on top of tables/desks

Nesting allows for extended desk surface and classroom storage

# Raving Reviews

## Teacher & Student Reviews

### **Attractive & extremely functional**

*Students enjoy using the Vidget in the classroom in a variety of ways, from writing to role playing. The chairs appear to help the children focus and help with proper posture at the writing center. The rocking function appeals to the children as well. The chairs are attractive and extremely functional.*  
Laurie, Teacher

### **Attention is better**

*I found the Vidget as a rocking chair very helpful for most students who used it during circle time and story time. It was soothing to some, and their attention was better.*  
Colleen, Teacher

### **Students are able to focus**

*Students who were unable to remain seated independently or maintain attention to task have improved in this area. It gives them just enough movement.*  
Niki, Teacher

### **6th Grade Student Comments - Integrated Classroom**

*The little bumpy things are helpful. The movement of the chair is helpful. Basically the whole chair is helpful.*  
*I was able to focus in the chair mode with the bumpy things while moving. This helped me pay attention.*

## Coming Soon: Glow Vidget™

# Sensory Benefits

## Improves Attention and Focus

Fidgety fingers naturally find sensory bumps in side handles which provide a tactile and discrete texture to use when in need of extra sensory input. Therapy bands easily slide under the chair or tie to top handle to improve gross motor skills and facilitate muscle tone.

### “Happy & Engaging

*I have noticed an **improvement in attention span, participation and regulation** in my students. They are happy and engaging in classroom routines & activities.*

**Tara, Teacher & Occupational Therapist**

# Therapy Tool

## Allows for Self-Regulation

Stable and durable, the Vidget Flexible Seating System™ supports occupational, physical and speech therapy in a healthy way by engaging the user's vestibular and proprioceptive systems. Great for use as a therapy tool for early childhood - adult.

### Therapy Benefits

- facilitates core muscle development
- improves balance & equilibrium
- provides proprioceptive input
- promotes sensory regulation
- engages vestibular system
- safe: can't tip backwards
- ergonomic design
- large motor development
